

RenCap Securities Russia: New Investment Horizons 4th Annual Equity Conference

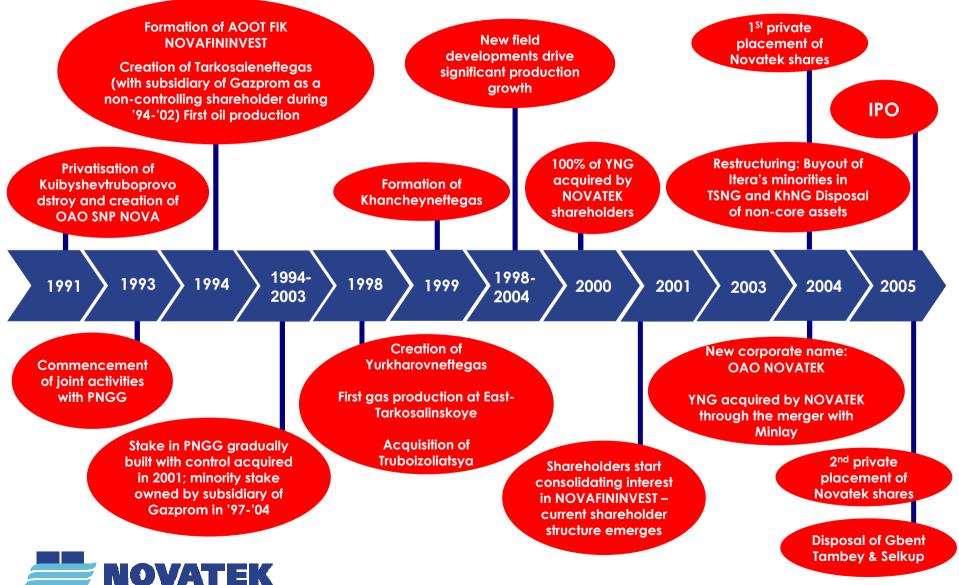

Mark A. Gyetvay, Chief Financial Officer and Member of the Board of Directors The Metropolitan Club, New York, NY Thursday, October 20, 2005

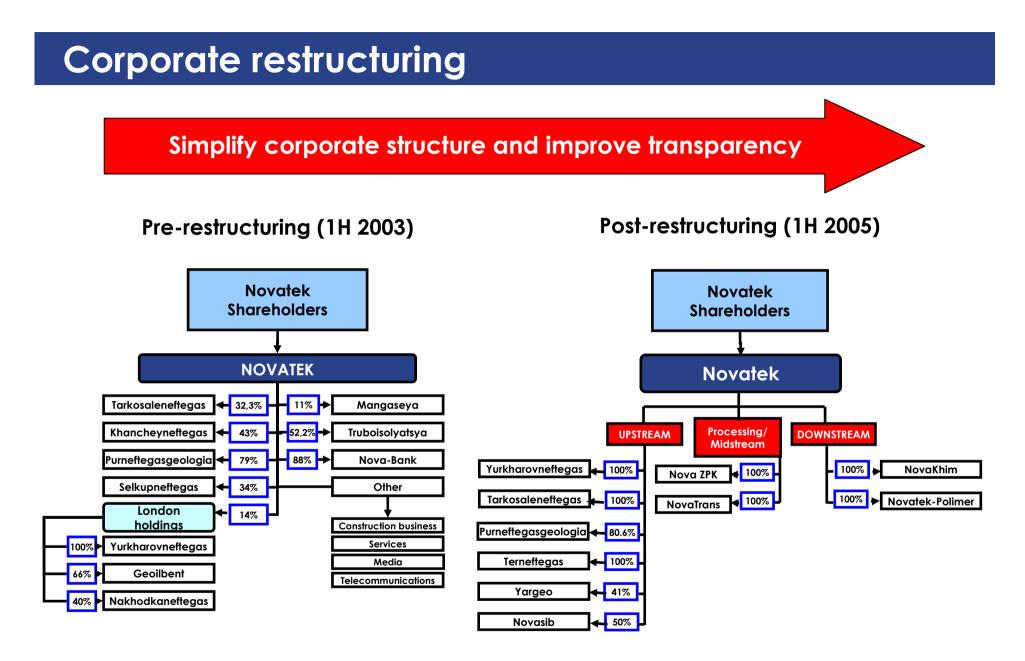

Novatek reserve summary

2

History of NOVATEK

First half financial and operational results

Summary highlights

- Commencement of operations at the Purovsky processing plant and Vitino port facilities in June 2005
- Commencement of **BOPP production** at Novatek-Polimer
- Disposals of our 66% participation interest in Geoilbent, our 34% equity stake in Selkupneftegas and our 25.1% equity stake in Tambeyneftegas in June 2005
- Significant increase in **hydrocarbon sales volume** (HoH):
 - Natural gas sales volumes increased by 48.6%
 - Liquids sales volumes increased by 27.1%
- Record revenues and earnings driven by volume growth and favorable domestic and international price environment
- Continued aggressive debt reduction program RR 5,461 million since beginning of year (as of 30 June 2005)

Robust financial performance

| RR million | 1H04 | 1H05 | +/(-) | +/(-)% |
|---|--------|--------|---------|--------|
| Total revenues | 13,053 | 18,359 | 5,306 | 41% |
| EBITDA ⁽¹⁾ | 3,718 | 12,610 | 8,892 | 239% |
| EBITDA net of disposal gains ⁽²⁾ | 3,718 | 8,999 | 5,281 | 142% |
| Corporate Income Tax Rate | 33% | 25% | (8%) | |
| Profit attributable to Novatek | 2,318 | 7,923 | 5,605 | 242% |
| Capex | 4,212 | 3,201 | (1,011) | (24%) |
| Net debt ⁽³⁾ | 8,576 | 16,195 | 7,619 | 89% |
| Net debt / Net debt + Equity | 39% | 24% | (15%) | |

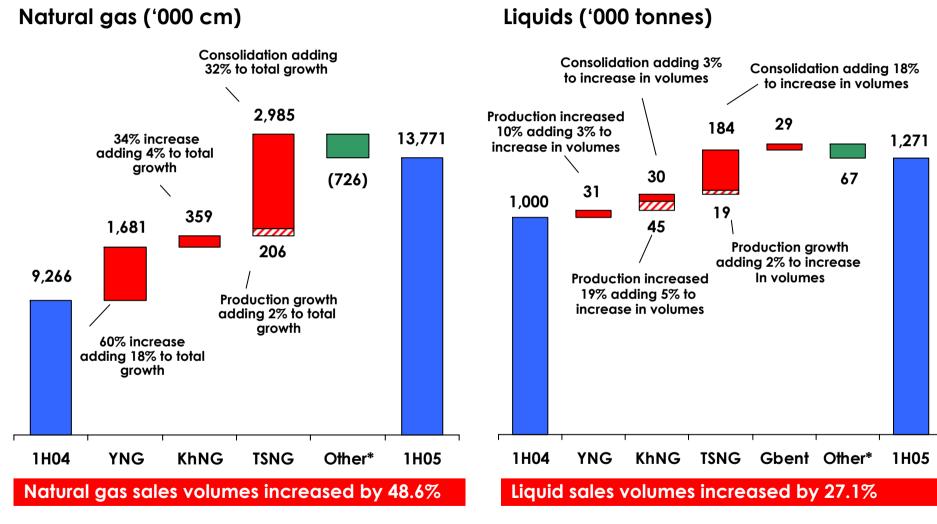

Notes:

1 EBITDA defined as net income plus total finance expense plus depreciation, depletion and amortization plus total income tax expense 2 EBITDA less gain on disposal of investments in oil and gas producing subsidiaries and associates

3 Net debt calculated as long-term debt plus short-term debt less cash and cash equivalents

Capital market transaction review

Landmark transaction

- Second largest IPO of a Russian issuer, the first IPO of a Russian independent gas producer and the first Russian issuer under new UKLA requirements (effective 01.07.05)
- Morgan Stanley and UBS: Joint Global Coordinators
 Morgan Stanley, UBS and CSFB: Joint Lead Managers and Joint Bookrunners
 Troika Dialog: Co-Lead Manager
 Alfa Capital Markets and Vnesheconombank: Co-Managers
- The transaction priced at US\$ 966 million (including 10% greenshoe option) and the book was more than thirteen times oversubscribed. The GDR's priced at the top of the US\$ 14.75 16.75 price range
- Novatek considered a must own stock in Russian portfolios and a pure play on the Russian gas market

Management roadshow

Management conducted 56 One-on-One meetings with investors as well as a series of group meetings and conference calls in Moscow, London, New York, San Francisco, Boston, Frankfurt and Rotterdam

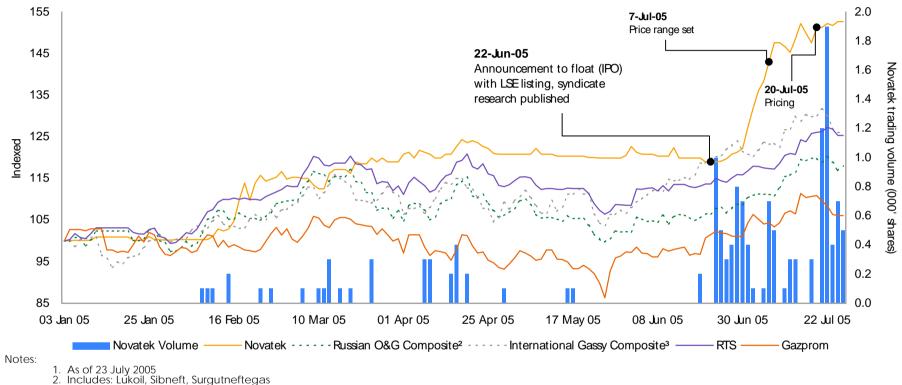

Roadshow schedule

Summary of meetings

Novatek trading performance pre-IPO

Includes: Burlington Resources, XTO Energy, Chesapeake Energy, Encana, Quicksilver Resources, Bill Barrett, BG

Novatek shares rallied approximately 39% over the marketing period of the IPO

- +15% since announcement of price range, over the bookbuilding period
- +39% since the announcement of the IPO, over the marketing period

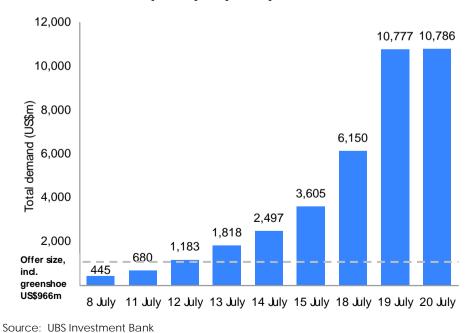

Book summary

Limited price sensitivity across the price range and an extremely well covered book representing the largest ever demand for a Russian IPO

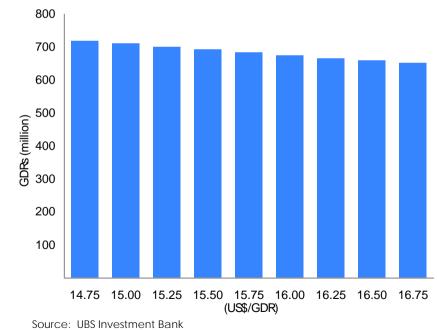

| Summary of final book of demand | |
|---|-------------|
| Total demand @ US\$ 16.75 per GDR | 681,581,020 |
| Coverage @ US\$ 16.75 per GDR (excl. Greenshoe) | 13x |

Demand build up day-by-day (at mid point of range)

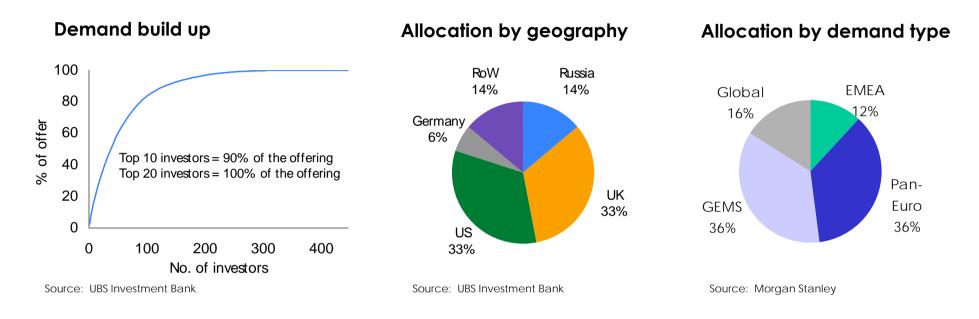

EK

 (\bullet)

Demand at price

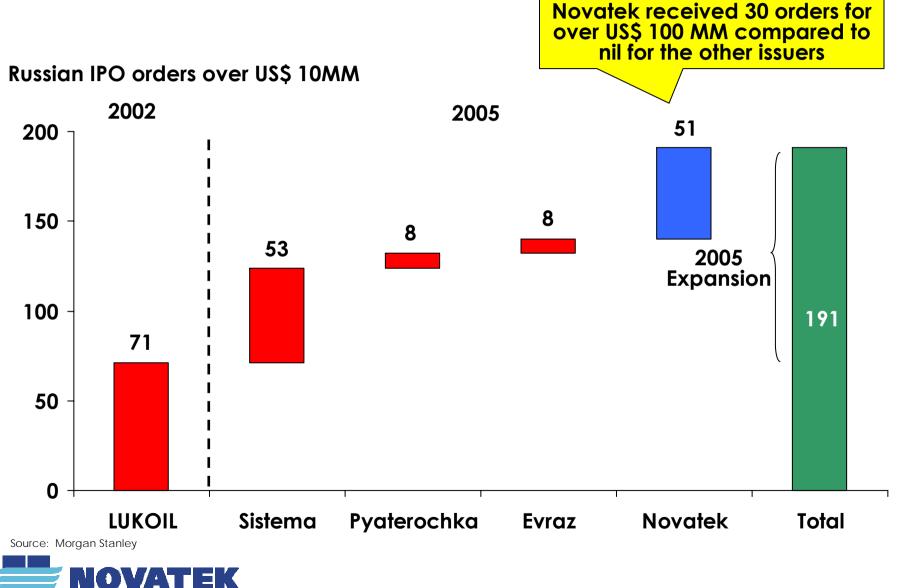

IPO allocation

- High quality investors declared interest early on and placed sizeable orders before meeting management
- Early demand covered the book in the first two days of the roadshow supported by Russian dedicated funds generating critical mass
- \checkmark Large orders and oversubscription resulted in the book closing two days early
- Thirteen times coverage from a good mix of Russian dedicated funds, global funds and sector specialists

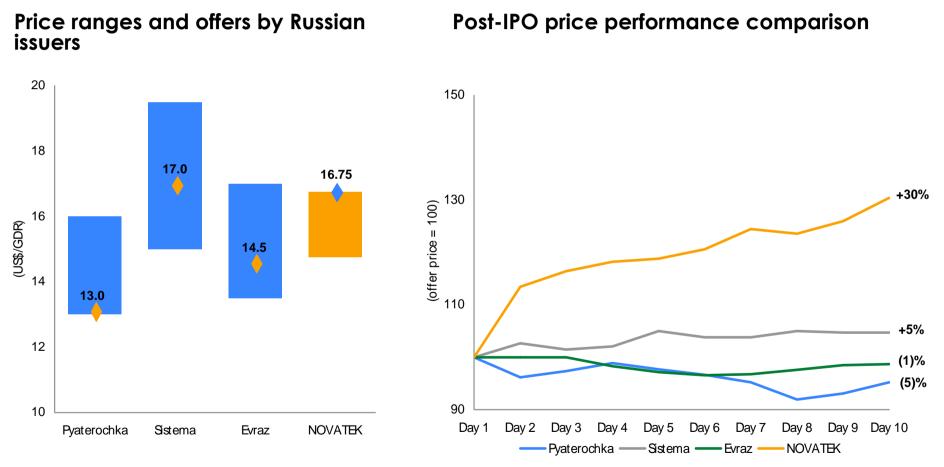

Evolution of new investors in Russian IPO's

First Russian IPO to price at the top range

Novatek has demonstrated the strongest performance among recent Russian deals

Forward–looking statments

Matters discussed in this presentation may constitute forward-looking statements. Forward-looking statements include statements concerning plans, objectives, goals, strategies, future events or performance, and underlying assumptions and other statements, which are other than statements of historical facts. The words "believe," "expect," "anticipate," "intends," "estimate," "forecast," "project," "will," "may," "should" and similar expressions identify forward-looking statements. Forward-looking statements regarding: strategies, outlook and growth prospects; future plans and potential for future growth; liquidity, capital resources and capital expenditures; growth in demand for our products; economic outlook and industry trends; developments of our markets; the impact of regulatory initiatives; and the strength of our competitors.

The forward-looking statements in this presentation are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management's examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control and we may not achieve or accomplish these expectations, beliefs or projections. In addition, important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include:

- changes in the balance of oil and gas supply and demand in Russia and Europe;
- the effects of domestic and international oil and gas price volatility and changes in regulatory conditions, including prices and taxes;
- the effects of competition in the domestic and export oil and gas markets;
- our ability to successfully implement any of our business strategies;
- the impact of our expansion on our revenue potential, cost basis and margins;
- our ability to produce target volumes in the face of restrictions on our access to transportation infrastructure;
- the effects of changes to our capital expenditure projections on the growth of our production;
- inherent uncertainties in interpreting geophysical data;
- commercial negotiations regarding oil and gas sales contracts;
- changes to project schedules and estimated completion dates;
- potentially lower production levels in the future than currently estimated by our management and/or independent petroleum reservoir engineers;
- our ability to service our existing indebtedness;
- our ability to fund our future operations and capital needs through borrowing or otherwise;
- our success in identifying and managing risks to our businesses;
- our ability to obtain necessary regulatory approvals for our businesses;
- the effects of changes to the Russian legal framework concerning currently held and any newly acquired oil and gas production licenses;
- changes in political, social, legal or economic conditions in Russia and the CIS;
- the effects of, and changes in, the policies of the government of the Russian Federation, including the President and his administration, the Prime Minister, the Cabinet and the Prosecutor General and his office;
- the effects of international political events;
- the effects of technological changes;
- the effects of changes in accounting standards or practices; and
- inflation, interest rate and exchange rate fluctuations.

This list of important factors is not exhaustive. When relying on forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, especially in light of the political, economic, social and legal environment in which we operate. Such forward-looking statements speak only as of the date on which they are made. Accordingly, we do not undertake any obligation to update or revise any of them, whether as a result of new information, future events or otherwise. We do not make any representation, warranty or prediction that the results anticipated by such forward-looking statements will be achieved, and such forward-looking statements represent, in each case, only one of many possible scenarios and should not be viewed as the most likely or standard scenario.

The information and opinions contained in this document are provided as at the date of this presentation and are subject to change without notice.
